

121 AH Capacity at 100hr rate 12VDC

BATTERY CARE

- Active users charge daily; occasional users charge battery before any outing, after active use or every 90 days if no use.
- Only use with a specified charger. Only use appropriate charger to charge AGM vs GEL batteries as charging rates differ.
- Never use an automotive or wet type charger on an AGM/GEL battery.
- Top Charge your battery frequently and/or leave on a charger/maintainer.
- Charge the batteries at least once every six months.

STORAGE

- Batteries should always be stored fully charged in a cool and dry place to maintain maximum service life.
- Depending on storage temperatures, batteries hold their charge for 3 to 9 months until recharge is necessary. Above 30C (86F), recharge at 9 months. Above 40C (104F), recharge at 3 months. Do not store above 40C (104F).
- If a battery is stored for 9 months or longer without being charged, its service life may be shortened.
- Never store batteries in a sealed environment or incorporate into a sealed structure/enclosure.

WARRANTY

- 1 Year Warranty (from date of purchase)

Bronco™ AGM 121Ah 12V Battery BRN-1001

Easy Transporting

non-spillable and suitable for shipping by Commercial Air Cargo and land with no restrictions.

Built for Canadian Weather

Built to sustain our harsh Canadian winters, they will operate in -40C temperatures.

Store or Charge in Any Position

can be stored or discharged in any position thanks to its spill-proof construction but should be charged in the upright position.

Accessories Included

Each battery includes free terminal covers, a handle and is completely boxed to ensure no hardware is lost during transport.
