

## SPRING-LOADED MID CLAMPS

### WHY SPRINGS

**Spring-Loaded Mid Clamps** - Fast-Rack's Mid Clamp has long been an industry favourite with drop in T-Bolts & Integrated Bonding. By adding a spring to our Mid Clamp, installers will be able to secure the clamp anywhere they want on our rail without fear of it falling out - making our spring-loaded Mid Clamp easier and faster to install.

### MIGS ADVANTAGES

**BUILT-IN cETL CERTIFIED BONDING**  
Fast-Rack Mid Clamps feature integrated bonding that is cETL approved.

**FAST-RACK T-BOLT & FLANGE NUT**  
Fast-Rack's simplified one tool approach quickens installs and reduces errors.

**SPRING-LOADED**  
The spring holds the Mid Clamp in the rail - no more fishing for parts or dropping clamps.

Step #1

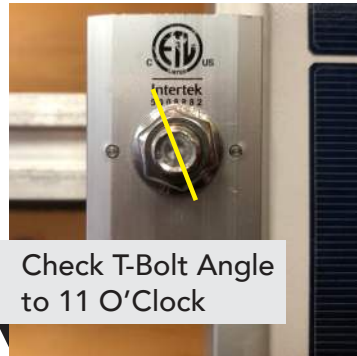

Drop in T-Bolt & Twist Mid Clamp 180°

Step #2

Slide Mid Clamp To Module

Step #3

Check T-Bolt Angle to 11 O'Clock

Step #4

Place Second Module & Tighten Nut
