

Talon

Sloped Roof Mount Attachment

FEATURES

- Waterproof seal with flashing
- Quick installation
- Secure connection to your roof
- Versatile mounting options

ADVANTAGES

- No truss locating required
- Fully engineered
- Multi-screw connection distributes loads
- Integrated water sealing gasket

The Fast-Rack Talon is a rafterless PV mounting attachment system that integrates seamlessly with the Fast-Rack Ultra rail system. The Talon allows L-Feet to be installed anywhere on your roof—not just over rafters. This system eliminates hunting for trusses, predrilling and accidental misses; saving you time on every install.

MADE FOR CANADA

Talon – Sloped Roof Mount Attachment

☑ Secure Attachment

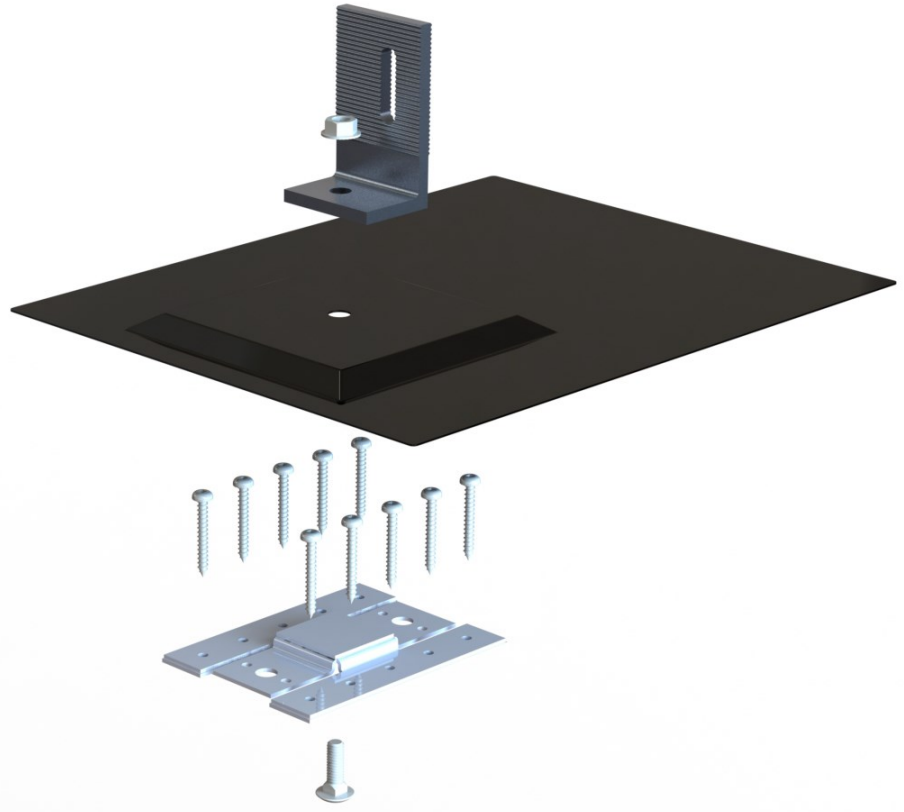

The Talon is fastened to the roof deck using 10 x #10 metal screws. This distributes the load and eliminates the requirement to fasten into a truss.

☑ Redundant Waterseal

A combination of an aluminum flashing and sealing gaskets on either side of the Talon ensure a watertight solution every time.

☑ Quick Installation

The Talon eliminates rafter hunting, predrilling and precise measuring across the roof. Fast, hassle-free installs keep your crew moving.

Durable: Every component has been tested to ensure quality, even in Canada's most extreme environments

Bankable: Fast installations and low cost solutions keep your projects on track.

Protected: Every Fast-Rack product is covered by our standard 10-year warranty.

Specifications

Waterseal	Aluminum flashing & sealing gaskets
Attachment	10 x #10 1-1/2" pan head square drive metal screws*
Option Attachment	2 x 5/16" lag screws for trusses
Components	Talon, L-Foot*, Flashing
Engineering	Pull-out testing to meet extreme loads
Rail Compatibility	Fast-Rack Ultra & HD Rails
Materials	Aluminum, Galvanized Steel

* #10 screws & L-Foot not included (optional)
